WHAT IS THIS PRODUCT?

TYPE:	Guernsey domiciled closed-ended investment company.
OBJECTIVES:	The Company's objective is to achieve medium to long-term returns through investment either in Vietnam or in companies with a substantial majority of their assets, operations, revenues or income in, or derived from, Vietnam.
INTENDED RETAIL INVESTOR:	An investment in the Shares is only suitable for institutional investors and professionally advised private investors who understand and are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses which may equal the whole amount invested that may result from such an investment. Furthermore, an investment in the Shares should constitute part of a diversified investment portfolio.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

← Lower risk Higher risk →

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The underlying assets may include illiquid assets such as real estate assets and/or non-quoted assets. These assets incur additional risks which are not considered in the indicator shown above when they do not represent a significant part of the underlying assets. These risks are that these assets could not be sold or not sold at the desired time and / or lead to significant losses. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the risk classes of this product as 5 out of 7, which is a medium-high risk class.

The reason for this classification is that the fund invests in a diversified portfolio of listed and unlisted equity investments in companies operating in an emerging country. The fund may also use a limited amount of leverage.

Be aware of currency risk. The company may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

This table shows the money you could get back over the recommended holding period, under different scenarios, assuming that you invest 10 000 GBP.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF VINACAPITAL INVESTMENT MANAGEMENT LIMITED IS UNABLE TO PAY OUT?

The Company is not required to make any payment to you in respect of your investment. If the Company were liquidated, you would be entitled to receive a distribution equal to your share of the Company's assets, after payment of all of its creditors. There is no compensation or guarantee scheme in place that applies to the Company and, if you invest in the Company, you should be prepared to assume the risk that you could lose all of your investment.

WHAT ARE THE COSTS?

COSTS OVER TIME

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10 000 GBP. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

INVESTMENT 10 000 GBP	IF YOU CASH IN AFTER 1 YEAR	IF YOU CASH IN AFTER 3 YEARS	IF YOU CASH IN AFTER 5 YEARS
Total costs	329.44 GBP	1 260.53 GBP	2 680.31 GBP

OTHER RELEVANT INFORMATION

Further information can be found at the Company's web site <https://vof.vinacapital.com>. The cost, performance and risk calculations included in this KID follow the methodology prescribed by EU rules. The Risk Indicator and Performance Scenarios are based on past share price returns with dividends reinvested. What you get back will vary depending on how the Company's underlying investments perform, how the overall market performs and how long you keep your investment. The stress scenario shows what you might get back in extreme market circumstances but does not take account of the situation where the Company is unable to pay you on its liquidation. The Performance Scenarios do not represent the upper or lower limits of potential returns.

IMPORTANT NOTICE: VinaCapital has followed the methodology prescribed by the Regulation (EU) 1286/2014 of the European Parliament and the Council ('the Regulation') for the preparation of this document. The requirements of, and methodologies prescribed by, the Regulation are not specifically tailored to companies with publicly traded securities such as VinaCapital Vietnam Opportunity Fund Limited. In particular, the Regulation requires that the potential future returns shown by the Performance Scenarios must be calculated using share price returns over the past five years which may prove to be too optimistic and not necessarily indicative of future performance. Accordingly, investors are cautioned against relying on this Key Information Document to estimate future returns or as a useful comparison against other investment products.
